GlobalVetLink Aides in Improving Paperwork Efficiency for Veterinarians

April 14, 2010 – Ames, Iowa – GlobalVetLink (GVL®) continues to add new features and improve existing applications to ease the paperwork burden on veterinarians. GlobalVetLink offers the nation's foremost electronic system for animal health documentation, including online reporting of EIA tests. GlobalVetLink is excited to partner with the recently signed Washington Animal Disease Diagnostic Laboratory at the Washington State University to offer electronic EIA certificates.

GlobalVetLink's electronic document system increases efficiency of veterinary paperwork. Documents are electronically available to state animal health authorities of both the state of origin and destination for health certificates and the state of origin for EIA certificates. Not only do the state animal health officials receive these certificates electronically, but the option to make them available through a secure, online site to the owners is also possible. Owners are granted access to MyVetLink.com at the issuing veterinarian's discretion, where they can print electronically signed, pdf copies of their EIA, GoPass® and health certificates.

Health documents generated through GVL's secure, online system are approved to move animals into all 50 states and 3 US territories. The GVL system is internet based, so there is no software to download and can be accessed from any computer with an internet connection. An important feature of the GVL system is that owner and animal information only needs to be entered once, and may be used over and over again. The GlobalVetLink database feature provides an easy and efficient way to create your health documents.

Digital photos are another enhanced feature over traditional hand-written certificates. Photos offer improved identification and eliminate hand drawn markings. The digital photo feature is easy to use, as pictures are stored in the database. New photos are only needed if the horse changes in appearance.

In addition to the online EIA (Coggins) and OCVIs (health certificates), GlobalVetLink offers GoPass (six month equine passport), electronic veterinary feed directives, and pharmaceutical prescription certificates to veterinarians in Washington.

If you'd like to learn more about GlobalVetLink and how it can improve efficiency at your practice, please visit our website at www.globalvetlink.com or call 515-296-0860.
